

Stefan Bordea

Software Engineer

Athens, Greece • +30 6909041912 • stefan@stefanbordea.com • [linkedin.com/in/stefanbordea](https://www.linkedin.com/in/stefanbordea) • [Github](#)

Software engineer, mainly focused on back-end development. Currently working for the largest tech and book retailer in Greece. Implementing software solutions for the company's projects in Java, Oracle ATG (Oracle Web Commerce), Oracle CSC & BCC customization, Spring Boot. Will be moving to the US in July on a green card.

WORK EXPERIENCE

Software Engineer

July 2022 – Present

Public Group, Athens, Greece

Collaborate with an agile team of 10 software engineers, responsible the group's web projects.

- Played a key role in designing a secure discount approval system that empowers business users to select which store managers have the authority to approve discounts of over 10%, mitigating potential abuse of the system.
- Identified and resolved critical bugs in the inventory tracking system utilized by the chain of the company's 54 retail stores, improving efficiency in the inventory management process.
- Engineered a user-friendly dashboard that enables business users to designate product filters from ElasticSearch as indexable by search engines, thereby enhancing the company's SEO optimization efforts.
- Streamlined the company's financial processes by diagnosing and resolving issues in the automated VAT deduction system.
- Built a reporting mechanism that detects and notifies developers of inventory importing failures from SAP ERP, resulting in a significant reduction in errors and increased efficiency.

Data Entry Technician, Technical Support

June 2021 – September 2021

Poseidon Software S.A., Athens, Greece

Worked in a fast paced environment providing tech support as well as accurate and fast data entry during my summer break. Recognized by my colleagues for my speed and efficiency in my job functions.

- Produced customized product catalogs for 100+ clients in the restaurant business.
- Coordinated with clients to tailor software solutions, resolve technical problems, and renew licensing agreements.
